

## Hand Gel

ChurchillPPS hospital grade Hand Gel has been formulated to exceed World Health Organisation standards and has been tested and approved to BS EN 1276:2009.

It is ready to use and possesses bactericidal activity in one minute at 20°C. The Gel contains no fragrances, just alcohol, Aloe Vera to remoisturise your skin, water and a gelling agent.

Simply pour enough into hands and wipe all over hand surfaces. The Gel alcohol content will evaporate away without leaving a sticky residue. Do not use on broken or damaged skin. The Gel should be applied direct to hands but any dirt or grime ought to be washed off first.

It can be stored for 12 months in original unopened packaging in a cool, dry, well ventilated place out of direct sunlight. Opened containers must be carefully resealed and kept upright to prevent leakage.

### HEALTH AND SAFETY

Contains a highly flammable liquid and vapour which can cause serious eye irritation and may cause drowsiness or dizziness. For external use only. A Material Safety Data Sheet is available upon request.
