

CovKill Sanitiser

This is a highly effective sanitising and deodourising spray held within a one-time use canister for use within vehicles or any enclosed space.

The odour-destroying fog created when the can is activated permeates fabrics, carpets and crevices to eliminate odours everywhere. By using ionised particles the Sanitiser does not rely on line of sight to reach all accessible areas.

The Sanitiser attacks bad odours by killing the bacteria causing the odour. It is also effective against a number of germs, bacteria, fungus and viruses, including Novovirus and Coronavirus.

Simply shake well and place the aerosol on a flat surface and depress the valve into the locking catch. Leave the vehicle or space. All windows and doors must be closed. Be careful not to spray the Sanitiser into your eyes as the spray is dispersed vertically.

Do not disturb for 15 minutes. The vehicle or space should be at 20⁰C to 25⁰C. Ventilate the vehicle or space by opening all windows and doors for 15 minutes before re-entering. You will notice a citrus fragrance that will dissipate over a few days. Each 50ml aerosol treats 2.8 cubic metres and the empty can is recyclable.

Use within 6 months of purchase and store in a cool, dry place out of direct sunlight. Keep between 5⁰C and 25⁰C.
